

METHOD AND SYSTEM FOR  
PRIORITIZING DEBT COLLECTIONS

ABSTRACT OF THE DISCLOSURE

- 5 A collections prioritization method and system for use in a financial services business is disclosed. The system is configured to generate a collection priority value from information stored on the system and queue the accounts for collection action based on the priority value and user entered filtering criteria. In one embodiment, the system is further configured to generate a report on the efficiency of collection by a collector.
